43 503 BST® Protective Measures

➜ BST®–BuildingSystemsTrainer

Learning objectives:

- **Mains of the consumer network**
- **Selection of protective measures for a consumer installation**
- **Measuring instruments for measurements to DIN VDE 0100-600, DIN VDE 0105-100 and BGV A3 select, apply, and interpret results**
- **Applying rules for initial and repeat test and set up a schedule of the required measurements**
- **Commissioning of a low-voltage system**
- **Perform and describe initial and repeat test of electrical systems and create a report**
- **Use of the personal ptotection equipment**
- **Planing an executing of electrical installations**
- **Troubleshooting in elektrical installations**

The flexible training system from ELABO*TrainingsSysteme* for building systems engineering, with real components, such as the meter cabinet, complying with the safety regulations. The system is characterised by the holistic approach to knowlege transfer. It is mobile and the workplace can be fitted in a individually from two sides. The trainee can work and make measurements with the highest possible safety under real conditions.

Apart from troubleshooting, flush mounted installation, replacement of NH fuses and lots more in terms of training content is possible. The working on the BST® is supported by comprehensive multimedia courseware in a multimedia manner.
